-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

In response to the applicants remarks to the election/restriction requirement of the previous office action the election/restriction date mailed 02/10/06 has been canceled. In light of applicants arguments and a better understanding of the invention in view of applicants arguments a new election/restriction requirement is put forth in this action.

#### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

Species I – Claim 6 where the profile has a pane of glass and a seal inserted to interface between the glass and the third element.

Species II – Drawn to claim 8 where the panel comprises a first and second fascia

Species III – Drawn to claim 9 where the panel comprises a first fascia and a solid core

Species IV – Drawn to claim 10 where the panel comprises a first and second fascia and a solid core

Species V – Drawn to claim 11 where the panel comprises a first fascia, a solid core and hinges

Species VI – Drawn to claim 12 where the panel comprises a first and second fascia, a solid core and hinges

Species VII – Drawn to claim 13 where the panel comprises a first and second fascia and hinges

Species IX – Drawn to claim 14 where the panel comprises a first fascia, a solid core, hinges and a handle

Species X – Drawn to claim 15 where the panel comprises a first and second fascia, a solid core, hinges and a handle

Species XI – Drawn to claim 16 where the panel comprises a first and second fascia, hinges, and a handle.

The species are independent or distinct because each embodiment of the different species requires a different combination of the four base elements and the panel is of a different configuration for each of the species namely having a solid core or glass panel or not, having hinges or not, having a handle or not, and having first and or second fascias.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 3 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica Laux whose telephone number is 571-272-
